

The New Owners of Corporate Iran

Iran's 20-Year Perspective Document concentrates on turning the country into a powerful knowledge-based economy with regional and international significance. Considering the country's vast resources and bearing in mind that most of these resources are in possession of the government, there is no doubt that the privatization process will be one of the crucial engines of this economic and technological development. The goal of **"New Owners of Corporate Iran"** is to gain a better understanding of the changing dynamics, emerging opportunities and practical limitations of cooperation or investment opportunities with these companies. The report will also describe how those opportunities can be accessed while analyzing potential business risks associated in partnering with semi-official entities.

The contents of this report are as follows:

Table of Contents
